

FARRAGUT™

Farragut is seeking a talented QA Automation Engineer to design testing procedures for our software applications. The Automation Engineer will be responsible for analyzing the functionality of applications and designing automated tests to validate their performance. You will also be required to identify bugs and collaborate with the software design team. To ensure success as a QA Automation Engineer, you should have programming skills, a keen eye for detail, and excellent project management skills. A skilled QA Automation Engineer is expected to design and write efficient test procedures for every software application.

QA Automation Engineer Qualifications:

- Be an advocate of quality making effective recommendations to drive innovation, team inspiration, and test automation
- Knowledge of an agile framework or method (i.e. Scrum), or understanding of software development life cycle models
- Guides and coaches other scrum team members on how to use automated practices and principles to deliver high quality products and services to our customers.
- Bring a Test-driven development mindset

QA Automation Engineer Responsibilities:

- Meeting with the software design team to discuss verification protocols.
- Works with Agile teams to understand end-to-end system functionality
- Collaborating with the design team to solve application faults
- Assist as needed other scrum team members in automated practices
- Develop and maintain quality automation code, as functionality changes evolve the products
- Writing automation scripts and implementing software applications.
- Identify areas where automation can improve quality and increase time to delivery
- Identifying software application weaknesses and target areas.
- Reviewing software bug reports and highlighting problem areas.
- Identifying quality issues and creating test reports.
- Prepare or update reports and documentation
- Identify and record bugs
- Manual testing as needed based on application needs

QA Automation Engineer Requirements:

- 5+ years of relevant industry experience
- 3+ years of automation experience
- Previous experience working as a QA Automation Engineer.
- Familiarity with C#
- Familiarity with AWS a plus
- Experience writing automated tests with tools like Selenium/WebDriver and others
- Backend testing experience
- Familiar with CI/CD/CT/CR practices
- Hands-on experience in writing UI automation using Selenium, TestComplete, or other programs
- Bachelor's degree required

Please send resumes to HR2@farragut.com

FARRAGUT™

- Advanced programming skills including automation systems.
- Familiarity with programming script languages including Javascript and Powershell
- Excellent analytical skills.
- Detailed knowledge of application functions, bug fixing, and testing protocols.
- Good written and verbal communication skills.
- Strong attention to detail.

Compensation & Benefits:

The salary for this position is determined based on candidate's education, work experience, and market salary information.

Farragut offers a competitive benefits package with benefits starting on your very first day of employment.

Benefits for full-time employees include:

- 20 days of paid time off + 7 paid holidays each year
- Comprehensive Medical Insurance, Vision, & Dental Plans
- 401k Matching
- Life Insurance, including both short & long-term disability

About FARRAGUT

Farragut is a provider of software solutions for the Local Government and Workers' Compensation markets. Specifically, we have created software that automates manual transactions and stores important data for Workers' Compensation Bureaus and NC counties. Farragut's systems allow our clients to better utilize their resources and do their work more efficiently.

Farragut's purpose is to transform with trust. We work to transform how our customers conduct their business by earning their trust and delivering continuous innovation. We lean on our three pillars of integrity, innovation and being service driven throughout the process. Farragut offers an environment where people who are passionate about achieving meaningful results, value innovation, and embrace our customers' objectives as their personal responsibility can excel.
